

Focus Questions  
Population Dynamics  
Chapter 6  
APES

Focus Questions

**Chapter 6**

- Explain why human population growth is not distributed evenly. (6-1)
- Explain the factors that affect birth rate and death rate. (6-2)
- Describe what has caused the changing United States population growth rates. (6-2)
- What information can be determined from an age-structure diagram? (6-3)
- Explain what happens in each stage of demographic transition. (6-4)
- Explain how human population growth is slowed. How have China and India approached this problem differently? (6-4)

Key Terms

**Chapter 6**

age structure (p. 130)  
birth rate (p. 126)  
crude birth rate (p. 126)  
crude death rate (p. 126)  
death rate (p. 126)

demographic transition (p. 133)  
family planning (p. 134)  
fertility rate (p. 126)  
infant mortality rate (p. 128)  
life expectancy (p. 129)

migration (p. 129)  
population change (p. 126)  
replacement-level fertility (p. 126)  
total fertility rate (TFR) (p. 126)
